Introduction

IN PRESENTING this booklet to you we do so, not only in an effort to sell you machines and novelties, but also in an honest endeavor of placing you in a better financial condition. In our twenty years experience we can point with pride to the thousands of successful operators whom we have started on the road to success, oftentimes by the operation of a single machine.

It is not too late now to make a start as we have in our extensive line machines for every location and condition that will earn from 100% to 500% on the investment easily and quickly. For so-called closed territories we have legitimate machines that are enormous money getters, as for example the weighing or vending types. For open districts we have an endless variety from one slot to eighteen slot designs and for any imaginable coin.

Descriptions contained herein are but partial but they convey a good idea of the different constructions and their uses. Any additional information desired will be cheerfully furnished upon receipt of your request.

Why not join the long list of satisfied Caille customers?

MACHINES ON SHARES.

Opportunities to place machines out on percentage or shares arise everywhere. This means that the owner of machines puts them in different locations and gives the proprietor 25 per cent or more for the place and reserves the balance. This rate differs in some instances and usually depends upon the locality and the kind of device operated.

Every store is suitable for some kind of a machine and the profits are sure to be beyond expectation. Such places as Railway Depots, Waiting Rooms, Hotels, etc., are certainly fine for weighing machines and gum venders, or in fact anything along this line.

This booklet gives you but a fair idea of the different types of machines so it is really necessary that you fill in the attached post card, affix a one cent stamp to it and return to us. This may be the means of placing you in a good financial condition, such as is now being enjoyed by numerous operators everywhere.
