**OUR CATALOG** which is the only one of its kind in existence is a comprehensive list of all types of coin operated machines.

The aim of this catalog is to help you select just what you need whether it be ONE machine or a COMPLETE ARCADE. New or rebuilt—the largest selection of its kind in the United States is to be seen in the penny arcade headquarters on our premises, 577 Tenth Avenue, New York City diagonally across from the new West Side Air Terminal.

#### IMPORTANT INFORMATION

Trade papers in the industry have warned!! "Certain machines may be advertised as low as \$75.00 while other jobbers will offer the same machine at \$100.00 to \$150.00 or more. Some customers are baffled by this wide range of prices for the same game."

With very few exceptions, the advertiser does not state the condition of the advertised machine. The buyer must gamble in buying "as is". This means that the machine may not even work at all. Important parts may be missing or worn out—and it may be impossible to replace them since the manufacturer has since discontinued this item, and has no more parts left, or the manufacturer has gone out of business.

Mike Munves sells only equipment that is carefully reconditioned and refinished to look and perform like new. You do not gamble when you order from MIKE MUNVES.

#### COMPETITIVE TWO PLAYER GAMES

Two player games invite competition. The element of competition is an incentive to keep playing. Continued play means more money. Competitive two player games always get a play and always are top money makers. Boost your play with competitive two player games.

#### REVOLUTIONARY GAMES

The past few years have seen the coin machine market enriched by quite a few outstanding money-makers. These were confined mainly to guns and baseballs.

The demand calls for a greater variety. Here we have a striking example from last year. This was the appearance of Williams Sidewalk Engineer. This did not look like a game that would appeal to the public—yet in every arcade it turned out to be one of the most successful games to ever appear.

In this catalog you will find many games—new and earlier models rebuilt to look new—that are not now in your arcade. Why not make your arcade look different? Study this catalog and select some games you do not now have. Remember, something fresh and different will keep your customers interested, and when the customer walks into your arcade he will not be able to say "Let's go somewhere else, I played those machines last year!"—but instead, he and his friends will stay in your place and fill the coin boxes of your novel, different games.
